🎨 **playwell**

The setting up of nurseries and kindergartens promotes autonomy.
Children orient themselves in a space that offers suitable places for every moment of daily life:
*playing and activities, lunch, or rest.*

The furniture organizes the space.
It completes the architecture of the building.
It divides very large rooms into different areas.
It creates places for different activities.
It builds a network of learning opportunities and activities.

Giovanni Fumagalli

Senior architect from Italy dedicated
in kindergartens and schools for over 20 years.

CONTENT

CONCEPT AND GOALS

The new line of Beleduc furniture for nurseries and kindergartens features a linear, essential, and minimalist design with the goal of creating a peaceful and bright environment that is welcoming to children.

The project places children at the center, with furnishing that shapes the space where they move, live, play, and express themselves. The furniture serves as a foundation for games, experiences, and relationships, and should create space rather than make use of it.

A few essential colors coexist harmoniously within the space, creating an environment where the new furnishings are ready to showcase children's drawings and creations.

SOURCES OF INSPIRATION

Beleduc furniture is linear and modern, inspired by Italian humanistic culture, Scandinavian design, and Asian minimalism.
These solid and universal sources of inspiration are well-known and loved all over the world. This project has been guided by certain images that have pointed us in a new direction.

The new furniture line will follow these sources of inspiration and continue to grow, develop, and become more enriched.
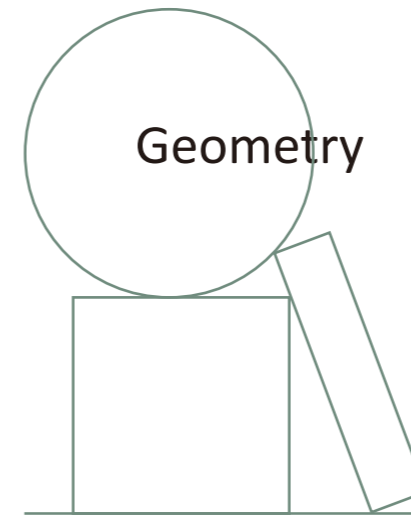

Italian humanistic culture

Scandinavian design
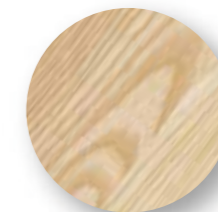

Asian minimalism

DESIGN KEYWORDS

Geometry

The design of Beleduc furniture is guided by clear geometry, with horizontal lines, squares, and circles which serve as the basic element of each object. These elementary forms are easy to understand and convey a sense of order and serenity. They also provide a great background for more complex objects. By developing designs around elementary geometric shapes, we create versatile, flexible and welcoming spaces.

COLOR PALETTE
Simplicity Lightness Harmony

Three particular colors - yellow, green and blue - serve as chromatic accents that can be found in some of our furniture pieces.
We carefully select materials and colors to create a wide range of compositions.

DIVERSIFIED FURNITURE

Our school furniture is carefully crafted through observation of children and their activities in nurseries and kindergartens.

Our team of designers, educators, and craftsmen collaborate to reinterpret common objects in original ways and create new items that offer unique possibilities and ways of use.

INFINITE COMPOSITIONS

Our furnishings are modular elements designed to create spaces, much like the bricks in a wall, a structure made of wood, or the pieces of a mosaic. Simple, linear elements without decorations are used to create welcoming, rational, and elegant arrangements.

DIFFERENT LEARNING ENVIRONMENTS

The new range features a series of different pieces that are beautiful, practical and durable. These include shelving-cabinets, tables, chairs and cots. Beleduc furniture will introduce a unique and modern look to any high-quality learning environment.

HIGH QUALITY

Our products are made of sturdy plywood and feature an easy-to-clean melamine oak finish.
We take safety and durability seriously, which is why all our products undergo rigorous testing in accredited laboratories to ensure they meet our high standards of safety and resistance.

Highlights

The Beleduc table range features six unique shapes and is available in natural oak and white finishes. The tabletops are water-resistant and scratch-resistant, ensuring durability. Each tabletop includes soft PU edges that provide a smooth touch while also being scratch and water resistant. For convenience, the table legs and tops are packed separately, allowing for easy assembly and customizable combinations.

Choose Table Legs

The non-adjustable table legs are designed with five standard height options to meet international standards. It also has a leveler at the base made of plastic which also acts as a protector. Constructed from metal with a natural oak or white finish, these legs are crafted to perfectly complement all tabletop styles. Assembly is quick and effortless: simply attach the legs to the pre-mounted metal plates on the tabletop, completing the setup in seconds.

Reliable Back Support

25mm

**150kgs
330lbs**
Weight Capacity

●Stackable school chairs with round edges and non-slip legs. Build with a sturdy 25mm (1 inch) frame, supporting up to 150kg (330lbs) in weight.

As a general rule, we recommend a 150-210mm (5.9-8.3inches) gap between the seat height and tabletop to ensure children in each age range can sit comfortably with their feet flat on the floor. While chair and table heights may vary across our range, the following guide will help you choose the right sizes for each room in your classroom.

| Age of children	Approximate minimum seat height	Approximate table height
1-2	150mm (5.9inches)	360mm (14.2inches)
2-3	210mm (8.3inches)	400mm (15.8inches)
3-4	300mm (11.8inches)	470mm (18.5inches)
4-6	350mm (13.8inches)	550mm (21.7inches)

CABINETS

The design of Beleduc furniture is child-centered and thoughtfully crafted. The cabinets can divide a room into designated learning spaces, encouraging children to explore, play, and learn. Research shows that sparking a child's curiosity fosters a love of learning and contributes to long-term success.

Flat and strong packaging for international delivery.

The durable plywood board (18mm/.71in) is available in white or a natural wood-colored finish with an HPL anti-scratch and water-proof surface.

Child Protection

Open the door through the opening at the top.

Designed with a safe, slow closing hinge for added protection.

Alternative Bases

Lockable castors (height 72mm/2.83in) sold separately.

Feet come with 2 heights (72mm & 20mm/2.83in & .79in).

*Castors sold separately (**846672**).

Cabinets

These single layer shelves are designed for the toddler rooms. The lower height allows children to easily take and return their toys or resources independently. They also work great as a room divider. Made of plywood, the shelves feature a modern look with white and natual oak colored, fireproof, and scratch-resistant HPL veneer. An easy-to-follow instruction manual is included, and assembly is required.

The Irene Wooden Cot

These comfortable children's cots are stackable and easy to handle. They are an excellent space saver for nurseries and kindergartens, and can be stored compactly and accessed easily when needed.

The round corners and semi-circular modules are designed to maximize room space and allow for versatile connections to different learning areas. These modules can be combined with other shelves to create features like an island, a displaying stage, or an "L" shaped room divider. Made from plywood with a modern finish, the pieces feature white and natural oak-colored HPL fireproof and anti-scratch veneer. A detailed instruction manual is provided, and assembly is required.
