About EDUcare

The Educare 0-3 year old infant and toddler product line comes from beleduc, a German educational toy company with 60 years of design, production, and sales experience.

Educare childcare product line:

Renowned child neuroscientist Dr. Pat Levitt has shown in his research that "brain development is bottom-up, and only by cultivating basic skills can more sophisticated higher-level skills be produced." Children first develop "sensory abilities (visual, auditory, tactile)," followed by "movement and language," and finally "higher-order cognitive abilities (problem-solving skills)."

The 0-3 year old infant and toddler period is a time of rapid development of sensory abilities. To meet their developmental needs in sensory, movement, language, and cognition, and promote physical health, beleduc has launched the Educare product line, which provides a series of stimulating, exploratory, and elegantly designed activity materials for infants and toddlers aged 0-3 years.

These game materials are made with education and care, allowing infants and toddlers to learn, experience, live, and grow happily.

From infants to toddlers: Growing abilities through play

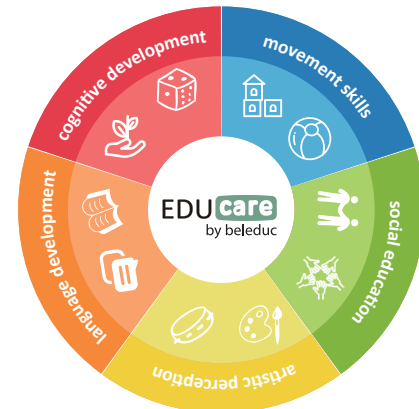

Infants and toddlers aged 0-3 years experience various types of sensory stimulation, which is important for their sensory development and growth. Educare game materials can provide these sensory stimuli, allowing children to learn about their environment while playing and develop necessary skills.

From games to learning: Multi-domain development

Educare materials are divided into five areas: cognitive development, movement skills, social education, language development, and artistic perception. Cognitive development materials are further divided into cognitive science, mathematics, and thinking. These materials help cultivate various qualities and improve abilities such as coordination, balance, language, and thinking.

From institutions to families: Helping more babies grow

Educare is committed to helping infants and toddlers grow happily through game-based learning. They serve various childcare institutions and families, creating a safe, comfortable, and educational environment for them. The goal is to help more infants and toddlers pass through the early stages of learning and growth happily and successfully.
